

S2

Dust extractor

Description

The S2 Dust Extractor is specifically made to remove dust produced by working with concrete. It works best when connected to a grinder, scarifier, shot blaster, or saw that is small to medium in size.

The S2 has a 3-step filtration process that allows for continuous operation without filter clogs. Additionally, the filter can be cleaned without having to open the unit, and the dust can be collected in a Longopac bag.

This helps to protect the operator from inhaling harmful dust particles while using the S2 Dust Extractor.

Technical data

Power	110V 1-ph
Motors	2×1200W
Amp	16.5 soft start
Weight	114 lbs
Airflow	236 cfm
Water lift	100"

Pairing with Von Arx machines

With **VA 10 L**

With **FR 200**

Equipped with

- 2-stage industrial by pass motors
- Conical polyester Pre filter
- Hepa13 rated Hepa filter
- Jet puls filter cleaning
- 7,5m 2" hose
- Wand
- Floor tool with rubber blades
- Longopac collection
